Omega Maritime's operations are well organized in divisions, Work-over, Mud/Drilling Fluid, well testing, well overhauling/simulation, wellhead, drill pipe rental, cased hole logging, directional drilling, plugging, coiled tubing, pumping, well crisis management services, and other drilling services.

Omega Maritime is a leading provider of specialized oilfield services and equipment, focused **on serving**

the drilling and production-related needs of oil and gas companies as well as the plug and abandonment and decommissioning services required at the end of a well's life.

Leading energy producers rely on us for the services, tools, equipment and exceptionally trained personnel's needed to enhance and maintain the production of oil and gas wells. We play a vital role in all phases of a well's lifecycle – drilling production and decommissioning

Our Services include the following:

WELL INTERVENTION SERVICES

We are a leader in "rigless" related services – a cost-effective approach to delivering services and solutions aimed at maintaining and enhancing well productivity. We offer mechanical wire line, cased-hole logging (electric line) and perforating tubing, pumping and stimulation, artificial, snubbing, recompletion, engineering and well valuation, plug and abandonment (P&A) and decommissioning services.

RENTAL TOOLS

We procure, rent and sell specialized equipment and tools for use with well drilling, completion,
